Peale kahte Majori võitu Tuuril, Method putterite tehnoloogia on kättesaadaval kõigile. Tegemist on putteriga, mis ühendab endas pehmet polümeeri koos soonitud terasest labaga, saavutamaks kiiremat ja kontrollitumat palli veeremist greenidel. Sooned ei tekita puttamisel backspin'i, mis põhjustab palli hüppamist ning külglibisemist. Mida vähem putid hüppavad, seda rohkem kukuvad nad auku.

After two Major championship wins on Tour, Method putter technology reaches the whole field. What you get is a putter that combines soft polymer and milled steel grooves to generate faster, more controlled forward roll at impact. What you won't get is backspin that causes skidding and hopping. And the less putts hop, the more putts drop.

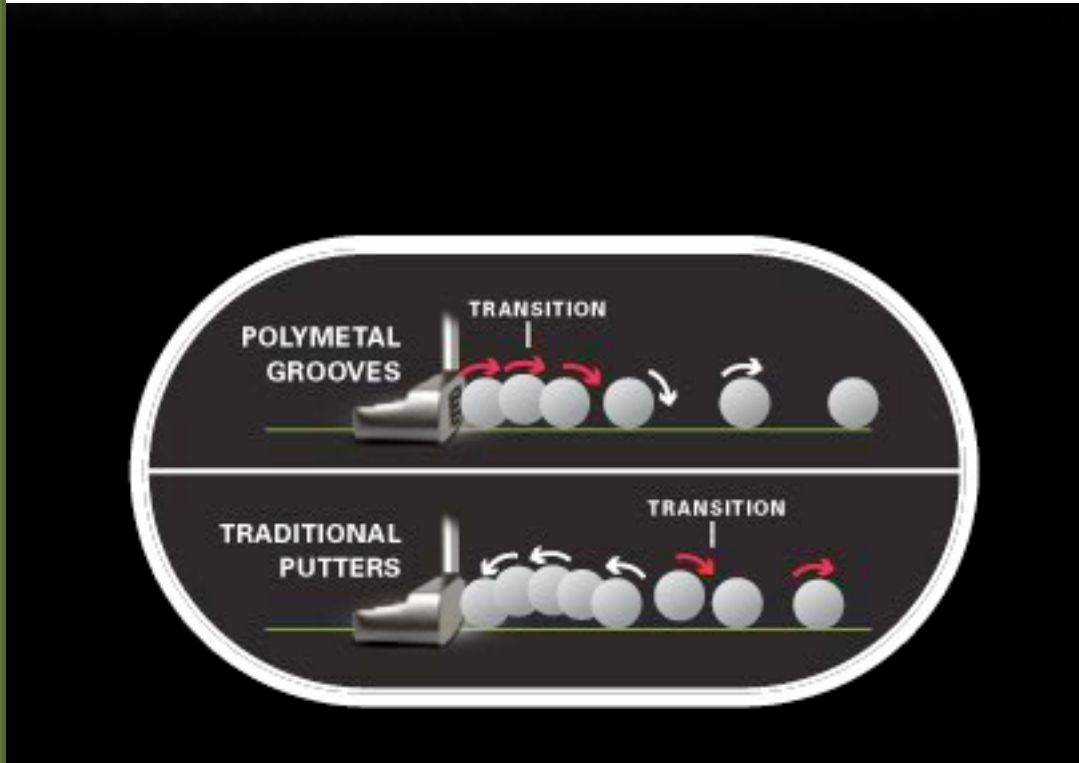

- 2011 aasta putterid revolutsioonilise tehnoloogiaga / 2010 year putters with revolutionary technology
- Saadaval alates 2011 aasta veebruarist / available since 2011 february
- Polymetal Groove tehnoloogia annab pallile kiirema veeremise laskmata pallil õhku tõusta. Sellega saavutatakse palju täpsem ning järjekindlam löök, mida golfi professionaalid on alati nõudnud. / Polymetal Groove Technology provides faster forward roll at impact without letting the ball jump. With that the kind of accuracy and consistency demanded by Tour professionals is achieved.

Slingshot Mixed Iron Set

http://www.nike.com/nikeos/p/nikegolf/en_EU/products/details?sku=GI7182-001

- Golfikeppide andestavus algab kaalujuhtimisest. Viies suurema osa kaalust sügavamale ja madalamale on tulemuseks suurem “sweet spot” ehk parima tabamise ala. Sügavam raskuskese eksisteerib kepilaba taga. Slingshoti kasulikkus seisneb suuremas andestamises kuna golfisett koosneb nii raudadest kui ka hübriididest / Delivering forgiveness in irons starts with weight management. Moving weight deeper and lower results in a larger sweet spot and a deeper center of gravity that actually exists in air behind the face. The benefit is a mixed set of hybrids and irons that are more forgiving and launch the ball higher
- Kaalujaotus: 30 grammi Nike PowerBow kaalu on viidud kepi tagumisse ning alumisse osasse, andes kõrgema pallikaare ning suurema andestatavuse / 30 grams of Nike PowerBow weighting low and back combined with deeper sole deliver high ball flight and forgiveness.
- Setis on ühendatud 3 ja 4 hübriidid 5 – PW raudadega, tagades parema andestatavuse / Hybrid 3 + 4 combined with traditional 5 – PW deliver forgiveness throughout the set
- Varred / Shafts:

SUIC varred True Temper / SUIC by true temper

Vastutulelikud, madalal asuvad raskuskeskmed ning terasest labad tekitavad kõrge lennukaare ning stabiilsuse, täpselt see, mida True Temper'ilt oodata / Responsive, low kick steel creates high launching performance with the stability you expect from True Temper.
